ABOUT PROTPURE

Building India's Downstream Bioprocessing Capability

Protpure Tech Pvt. Ltd. is developing India's indigenous chromatography resin platform for protein purification and downstream bioprocessing applications.

The company has established in-house capabilities for agarose bead synthesis, ligand functionalization, chromatography media development, process evaluation and customer deployment.

Today, Protpure offers **affinity, ion exchange, size exclusion** and **hydrophobic interaction** chromatography media to support biotechnology, diagnostics, vaccines and research organizations.

INDIGENOUS
CHROMATOGRAPHY
SOLUTIONS FOR
INDIA'S GROWTH

WHY INDIGENOUS CHROMATOGRAPHY MEDIA?

Currently, a significant portion of chromatography media used in India is imported. Protpure is working to strengthen India's biotechnology ecosystem by providing locally developed chromatography solutions with reliable supply, technical support and scalable manufacturing capability.

VISION

To establish a globally competitive indigenous chromatography resin platform supporting India's growing biotechnology and biopharmaceutical ecosystem.

MISSION

To develop and manufacture affordable, reliable and scalable chromatography media for protein purification, diagnostics and advanced biotechnology applications.

COMMERCIAL PROGRESS & MILESTONES

First Indian
Manufacturer of
Ni-NTA Agarose

Commercial supply of

AFFINITY CHROMATOGRAPHY PLATFORM

Metal-Chelate Affinity Chromatography Platform

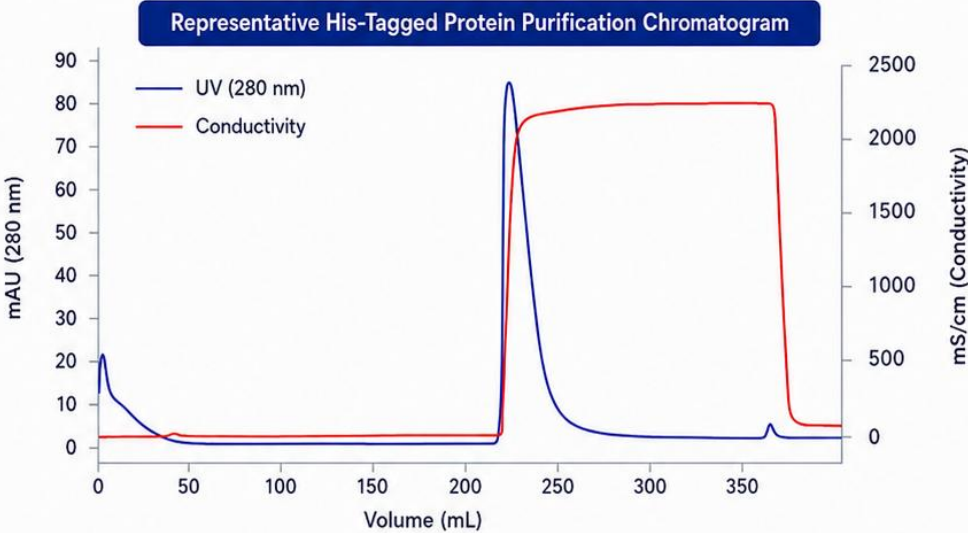

High Performance Affinity Chromatography Media for His-tagged Protein Purification

KEY FEATURES

- ✓ High binding capacity
- ✓ Excellent purity and recovery
- ✓ Consistent batch-to-batch performance
- ✓ Suitable for laboratory and process scale purification
- ✓ Reliable performance across multiple cycles

APPLICATIONS

- Recombinant proteins
- Enzymes
- Diagnostic proteins
- Vaccine antigens
- CRISPR-associated proteins
- Research and development

Chromatogram demonstrating robust binding and recovery characteristics using affinity chromatography resin.

COMMERCIAL AFFINITY RESIN PORTFOLIO

RESIN	TYPICAL APPLICATION
 Ni-NTA Agarose	General His-tag protein purification
 Co-NTA Agarose	Higher selectivity and reduced non-specific binding
 Cu-NTA Agarose	Specialized affinity purification workflows
 Zn-NTA Agarose	Alternative metal affinity applications

AVAILABLE FORMATS

Agarose Faster

High-throughput purification

Agarose Fast Flow

Routine purification

Agarose Precise

Enhanced process performance

Agarose HR

High-resolution purification

ION EXCHANGE CHROMATOGRAPHY PLATFORM

Indigenous Ion Exchange Chromatography Solutions

ANION EXCHANGE RESINS

Q Agarose

Strong Anion Exchanger

High capacity for capture and intermediate purification of proteins under a wide range of conditions.

DEAE Agarose

Weak Anion Exchanger

Ideal for proteins with moderate negative charge and applications requiring mild elution conditions.

KEY BENEFITS

- ✓ High binding capacity
- ✓ Excellent chemical stability
- ✓ Suitable for capture and polishing workflows
- ✓ Reproducible purification performance
- ✓ Compatible with a broad range of biomolecules

CATION EXCHANGE RESINS

SP Agarose

Strong Cation Exchanger

High binding capacity and excellent chemical stability for capture and polishing applications.

CM Agarose

Weak Cation Exchanger

Suitable for proteins with lower positive charge and mild purification conditions.

AVAILABLE RESIN FORMATS

Agarose Faster

High flow processing

Agarose Fast Flow

Standard purification

Agarose Precise

Improved separation

Agarose HR

High-resolution purification

Expanding Product Portfolio

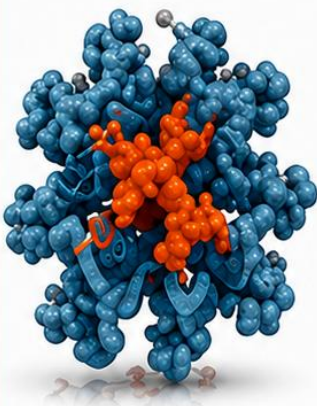

SIZE EXCLUSION CHROMATOGRAPHY (SEC)

Representative SEC separation profile demonstrating reproducible size-dependent fractionation performance.

PHENYL AGAROSE (HIC)

Hydrophobic Interaction Chromatography

- Protein polishing
- Aggregate removal
- Mild purification conditions
- High recovery of target proteins
- Process optimization workflows

PRODUCT PORTFOLIO OVERVIEW

AFFINITY CHROMATOGRAPHY

- Ni-NTA Agarose
- Co-NTA Agarose
- Cu-NTA Agarose
- Zn-NTA Agarose

ION EXCHANGE CHROMATOGRAPHY

- Q Agarose
- DEAE Agarose
- SP Agarose
- CM Agarose

SIZE EXCLUSION CHROMATOGRAPHY

- Agarose Size Exclusion Chromatography Media

HYDROPHOBIC INTERACTION CHROMATOGRAPHY

- Phenyl Agarose

MULTIPLE PLATFORMS

CONSISTENT PERFORMANCE

RELIABLE RESULTS

CAPABILITIES & COMMERCIAL DEPLOYMENT

From Resin Development to Customer Deployment

COLUMN PACKING FACILITY

Development and evaluation of chromatography media

PROTEIN PURIFICATION SYSTEM

Process development and purification optimization

BPG200 PROCESS COLUMN

Commercial implementation of Protpure chromatography media

WHY PROTPURE?

Indigenous Manufacturing

Reducing dependence on imported chromatography media.

Multiple Chromatography Platforms

Affinity, Ion Exchange, SEC and HIC solutions for diverse applications.

End-to-End Capability

From media development to purification evaluation.

Scalable Manufacturing Roadmap

Building future-ready capabilities to support India's biotechnology growth.
